

## **The Assembler Installation Instructions**

The Assembler can only run on systems using the Windows XP, Vista or 7 operating systems. Please follow the below steps to install and run the demo level.

- 1) Unzip the archive to a directory of your choice using an archiving program like winzip or 7-zip.
- 2) In the installation folder double-click on the Setup.exe file.
- 3) Follow the instructions provided by the setup program. The level will run automatically.
